Line-Interactive Power Supply

The EP Line-Interactive uninterruptible power supply (UPS) provides a steady, regulated AC output power to operate traffic signals, camera equipment and additional applications used in Departments of Transportation and Intelligent Traffic Systems (DOT/ITS). Built-in intelligence provides continuous operation during brownout and voltage spikes with Automatic Voltage Regulation. A robust inverter provides backup power when line voltage is not present, and the heavy duty battery charger provides recharging when line voltage is present. Status monitoring capabilities are provided through the LCD display, serial interface and optional Ethernet network card for remote monitoring.

EP 650				
010-034-11	The EP 650 is a Line-Interactive Uninterruptible Power Supply (UPS) with an output capacity of 650W.	3.5"H x 17.0"W x 9.0"D	650W	24VDC Battery System (2, 12V Batteries)

EP 1100				
010-037-10	The EP 1100 is a Line-Interactive Uninterruptible Power Supply (UPS) with a medium output capacity of 1100W.	5.25"H x 17.0"W x 10.25"D	1,100W	48VDC Battery System (4, 12V Batteries)

EP 2200-T				
010-022-10	The EP 2200-T is a Line-Interactive Uninterruptible Power Supply (UPS) with an output capacity of 1500W.	5.25"H x 17.0"W x 10.0"D	1,500W	48VDC Battery System (4, 12V Batteries)
019-020-10	Embedded Ethernet Communications Card for EP2200-T. Web page interface to allow monitoring and configuration of UPS remotely. SNMP and email notifications are available. NTCIP compliant.			

Double-Conversion Power Supply

Multilink's EDP Double-Conversion is an uninterruptible power supply designed to provide high quality, stable AC power to critical equipment that requires continuous, regulated power. With a pure sine wave output, the EDP provides power to sensitive loads with zero loss in output power. With 4 LEDs and a 4 line LCD display, UPS operating statistics scroll across the screen to provide at-a-glance monitoring. Ethernet connectivity is standard and includes an on-board web page for status monitoring and configuration. Compatibility with generators using the Multilink's Safety Automatic Transfer Switch (SATS) provides lasting back-up power during long utility outages and low battery shutdown. With 3 models to choose from, the Multilink Double-Conversion UPS is scalable to provide high efficiency with superior confidence in any environment.

The Compact BBS Cabinet

Traffic Cabinets

To reliably store Department of Transportation equipment, Multilink's Wolf PAC offers a variety of aluminum and stainless steel traffic control cabinets. These sturdy cabinets offer protection from severe weather conditions and keep internal systems cool enough to function on hot days with HVAC equipment. We offer our DOT cabinets in multiple sizes and styles so that our customers can find versions that meet their unique needs. To ensure our cabinets and enclosures perform to your expectations, we test all our products in a laboratory to meet or exceed NEMA 3R specifications and general DOT cabinet standards before placing them on the market.

Traffic management systems demand a robust battery that will perform well, even in harsh environments. Our AGM batteries have been relied on in backup traffic applications nationwide for more than two decades. All batteries include the following features and benefits:

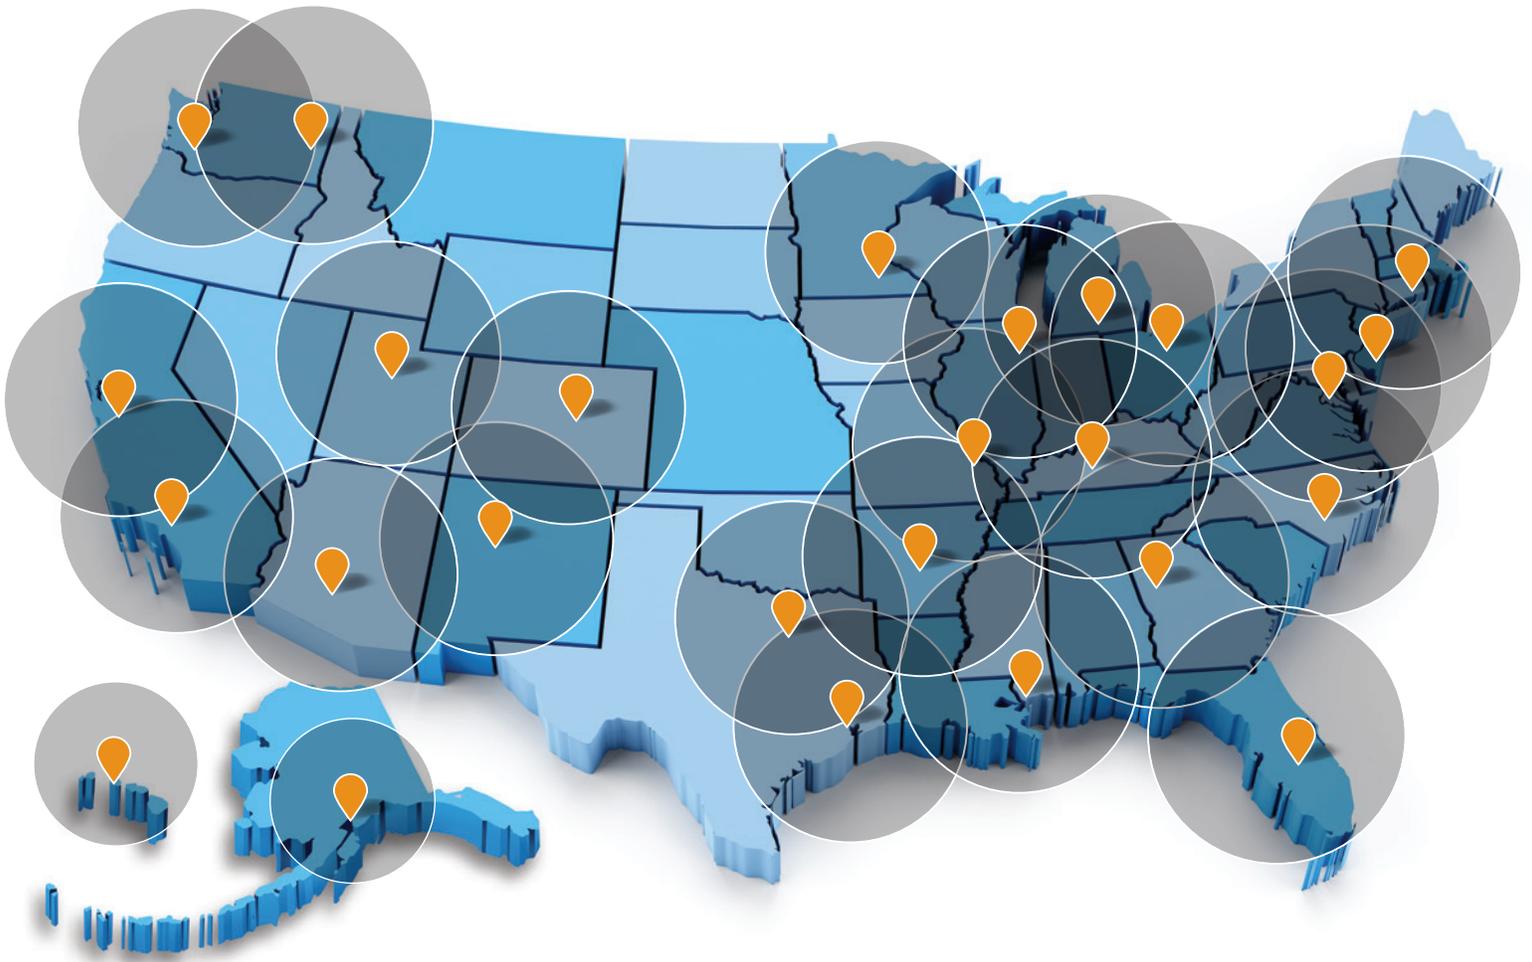

- » Sealed Absorbed Glass Mat technology. Valve regulated for efficient recombination
- » AGM technology eliminates periodic watering, corrosive acid fumes, and spills.
- » Exclusive IPF® Technology, Individual Plate Formation, optimizes power capacity, cell consistency, and long-term reliability.
- » Flame arresting, low pressure, self-sealing valves are 100% factory tested.
- » Over 250 quality control checks through ISO 9001 and ISO 14001.
- » Long service life even in the most challenging environments.
- » UL recognized component.
- » Made in USA with U.S. and Imported Materials.
- » 100% Recyclable at end of life.

ITS Connectivity Options

Slim Tap

The Slim Tap is an ideal solution when connections needed are moderate and space available is limited. Once the Slim Tap is installed, there is no need to replace the housing for any repairs – you can simply remove the adapter plate, perform any maintenance and re-install once complete.

- » Ideal for DOT cabinets
- » Mountable to the side of rack rails or DIN rails
- » Re-enterable for maintenance and repairs
- » Customizable features such as pigtails, adapters, and adapter panels.
- » Made in the USA

Wall Mount

The FWM Module series is designed for both patch and splice cabling when connections and space requirements are minimal.

- » Ideal for DOT cabinets
- » DIN rail mountable
- » Customizable Configurations
- » Available with custom pre-connectorized pigtails
- » Re-enterable for maintenance and repairs
- » Made in the USA

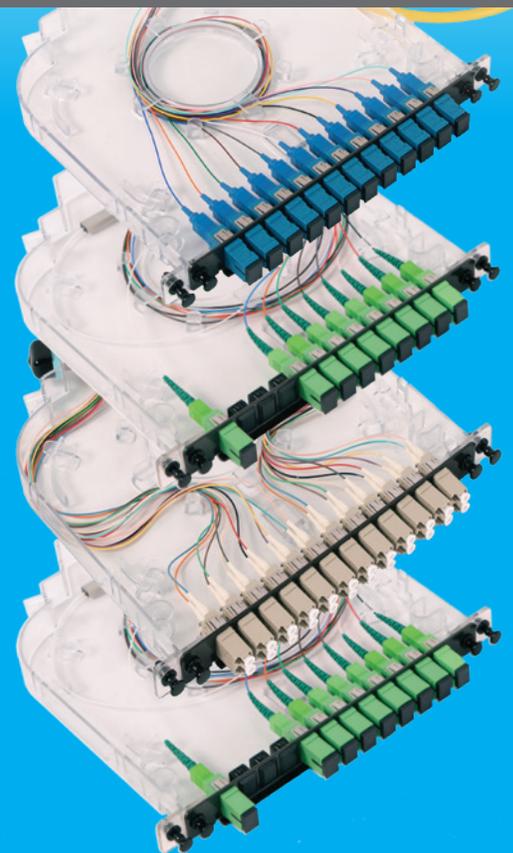

Looking to fiber up your bundle? Add one of these pups to your Wolf PAC! The Multilink Slim Tap, Wall Mounts and Rack Mounts all compliment the Multilink Power Products and offer the ideal solution for fiber networks and DOT/ITS applications.
